EDUCATION

B.A. Cognitive Science | Concentration: Cognitive Psychology
University of California, Berkeley - 2018

RESEARCH EXPERIENCE

Sanjuan Lab, University of New Mexico

Research Scientist I | October 2022 – May 2024

- Headed an ecological momentary assessment (EMA) study on alcohol and emotions
- Coordinated schedules and payments for 30+ participants during their 5 - 7 weeks of study participation
- Developed protocols for MRI visits, including creating fMRI tasks in Eprime and setting up physiological measures with AcqKnowledge and Biopac
- Consented participants and administered assessments such as: WASI, TLFB, Imagery Script Development, etc.
- Wrote and recorded personalized stress and neutral audio cues for fMRI scans based on each participant's Imagery Scripts
- Created short scripts and algorithms in R to clean, organize, and display data
- Submitted IRB modifications and updated measures on MetricWire and Redcap
- Recognized for exemplary performance by the Department of Family and Community Medicine (Dec. 2023)
- Software used: Eprime, AcqKnowledge, R, MetricWire, Redcap, SPSS

Kiehl Lab, Mind Research Network

Clinical Research Coordinator/Mobile MRI Technician | June 2021 – September 2022

- Set-up and managed three healthy control studies
- Recruited healthy control participants through various digital marketing methods
- Screened, called, and scheduled over 50 healthy control participants
- Managed multiple petty cash accounts
- Completed study visits with Healthy Control subjects, including consenting participants to the study and administering assessments such as: WASI/WRAT, TLFB, ASI, SES measures,
- Collected and properly stored saliva samples from participants
- Trained research coordinators on the administration of the consent form and the WASI/WRAT
- Scanned over 100 healthy community and incarcerated participants using various MRI & fMRI protocols
- Authored SOPs for the mobile MRI scanners and multiple study protocols, used to train future MRI tech's
- Conducted literature reviews
- Used a database of over 6,000 participants to examine personal research questions with the post-doctoral candidates in the lab
- Developed short scripts and algorithms in MATLAB to clean and organize data for analysis

- Attended a 40-hour prison training requiring high levels of professionalism
- Collected, entered, and managed participant data (COINS & Hard Copies)
- Software used: Eprime, Presentation, MATLAB, COINS

Brain Stimulation Lab, Stanford University

Assistant Clinical Research Coordinator | July 2019 – May 2020

- Created the budget and proposal, reviewed the literature, developed the protocol and RedCap project, choose the proper measures/questionnaires, and crafted an approved IRB proposal for an international, observational study assessing the effects of ibogaine on participants with a history of PTSD and/or TBI.
- Created and managed a small team to aid in the development of the PTSD/TBI study
- Implemented EEG protocols and ensured clean data recordings during afternoon TMS treatments for the SAINT-TRD Study.
- Administered SAINT-TRD with the MagVenture TMS device.
- Collected, entered, checked, and managed data (Redcap & Hard Copies)
- Helped prepare study binders for audits
- Ensured participant comfort during all study visits
- Software used: Redcap

Bonding and Attunement in Neuropsychiatric Disorders Lab, San Francisco Veterans Affairs Medical Center (SFVAMC) & University of California San Francisco

Research Assistant | August 2018 – July 2019

Volunteer Research Assistant | February 2018 – August 2018

- Promoted from a volunteer to a full-time employee after graduation from UC Berkeley
- Used motivational interviewing and other techniques to work effectively with a participant population of veterans currently struggling with opioid and stimulant abuse.
- Reviewed literature, organized and analyzed data, presented findings, and wrote a peer-reviewed journal article as a first author.
- Transcribed, analyzed, and assessed language use in group therapy sessions
- Collected, entered, cleaned, and managed data (Redcap & Hard Copies).
- Collected and cleaned HRV data.
- Administered study drug to participants (nasal oxytocin).
- Helped prepare study binders for audits
- Streamlined data processing and analysis by creating scripts in MatLab, Python, and SPSS
- Software used: Redcap, MatLab, Python, SPSS

Department of Psychology, University of California Berkeley

Student Research Assistant | May 2017 – May 2018

- Assisted in facilitating focus group discussions with current tobacco users
- Transcribed and used qualitative data to analyze focus groups
- Managed daily participant data and sent participants survey reminders for an EMA study
- Recruited, screened, and scheduled community participants for the study.
- Software used: Qualtrics

OTHER WORK EXPERIENCE

The Hythe | Vail, CO

Lobby Bartender | August 2024 – present

Pool Bartender | June 2024 – August 2024

The Daily Pint | Berkeley, CA

Lead Bartender | May 2017 – February 2018

Bridges Rock Gym | El Cerrito, CA

Rock Climbing Coach | October 2017 – May 2018

Belay Staff | May 2016 – May 2018

PRESENTATIONS

Poster Presentation

2019 Addiction Poster Session and Data Blitz, San Francisco | January 2019

Language use in oxytocin-enhanced motivational interviewing group therapy for methamphetamine-using men who have sex with men

PROFESSIONAL DEVELOPMENT

Psychedelic Sciences Convention

Presented by The Multidisciplinary Association for Psychedelic Studies & The Beckley Foundation
April 2017, Oakland, CA

Statistics 101: Principles of Statistics

Course taught through Study.com
August 2020 – October 2020, Virtual

fMRI Image Acquisition and Analysis Course

Analysis of neuroimaging data with Statistical Parametric Mapping, Independent Component Analysis, and more
Instructors: Kent Kiehl, Vince Calhoun, & Tor Wager
October 2021, Virtual

Exploring Psychedelics & Entactogens to Treat Psychiatric Disorders

National Academies' Workshop
March 2022, Virtual

Learn R; Analyze Data with R; Getting Started Off-Platform for Data Science

Courses taught through codecademy.com
August 2023 – May 2024, Virtual
